

Technology computer aided design (TCAD) of phosphor-free nanowire white LEDs

Kirk H. Bevan & Hong Guo

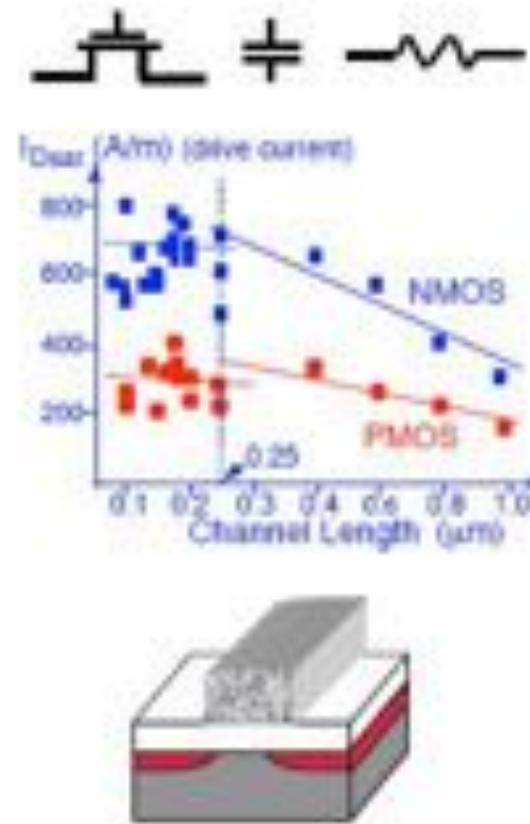

What is TCAD?

Extrinsic (and Layout)

Intrinsic (active/passive devices)

<http://en.wikipedia.org/wiki/File:TCAD-overview.JPG>

- Design for Manufacturing (DFM):
 - Phase Shift Masking (PSM); Chemical & Mechanical Planarization (CMP); Shallow-Trench Isolation (STI).

TCAD Companies & Market Value

SYNOPSYS®

- Yearly Revenues: ~1.5 Billion
- Employees: ~7000

SILVACO

- Yearly Revenues: ~10 Million
- Employees: ~250

COMSOL

- Yearly Revenues: Undisclosed
- Employees: ~250

CROSSLIGHT Software Inc.

- Yearly Revenues: Undisclosed
- Employees: ~25

NanoAcademic Technologies *Software Tools for Nanoelectronics*

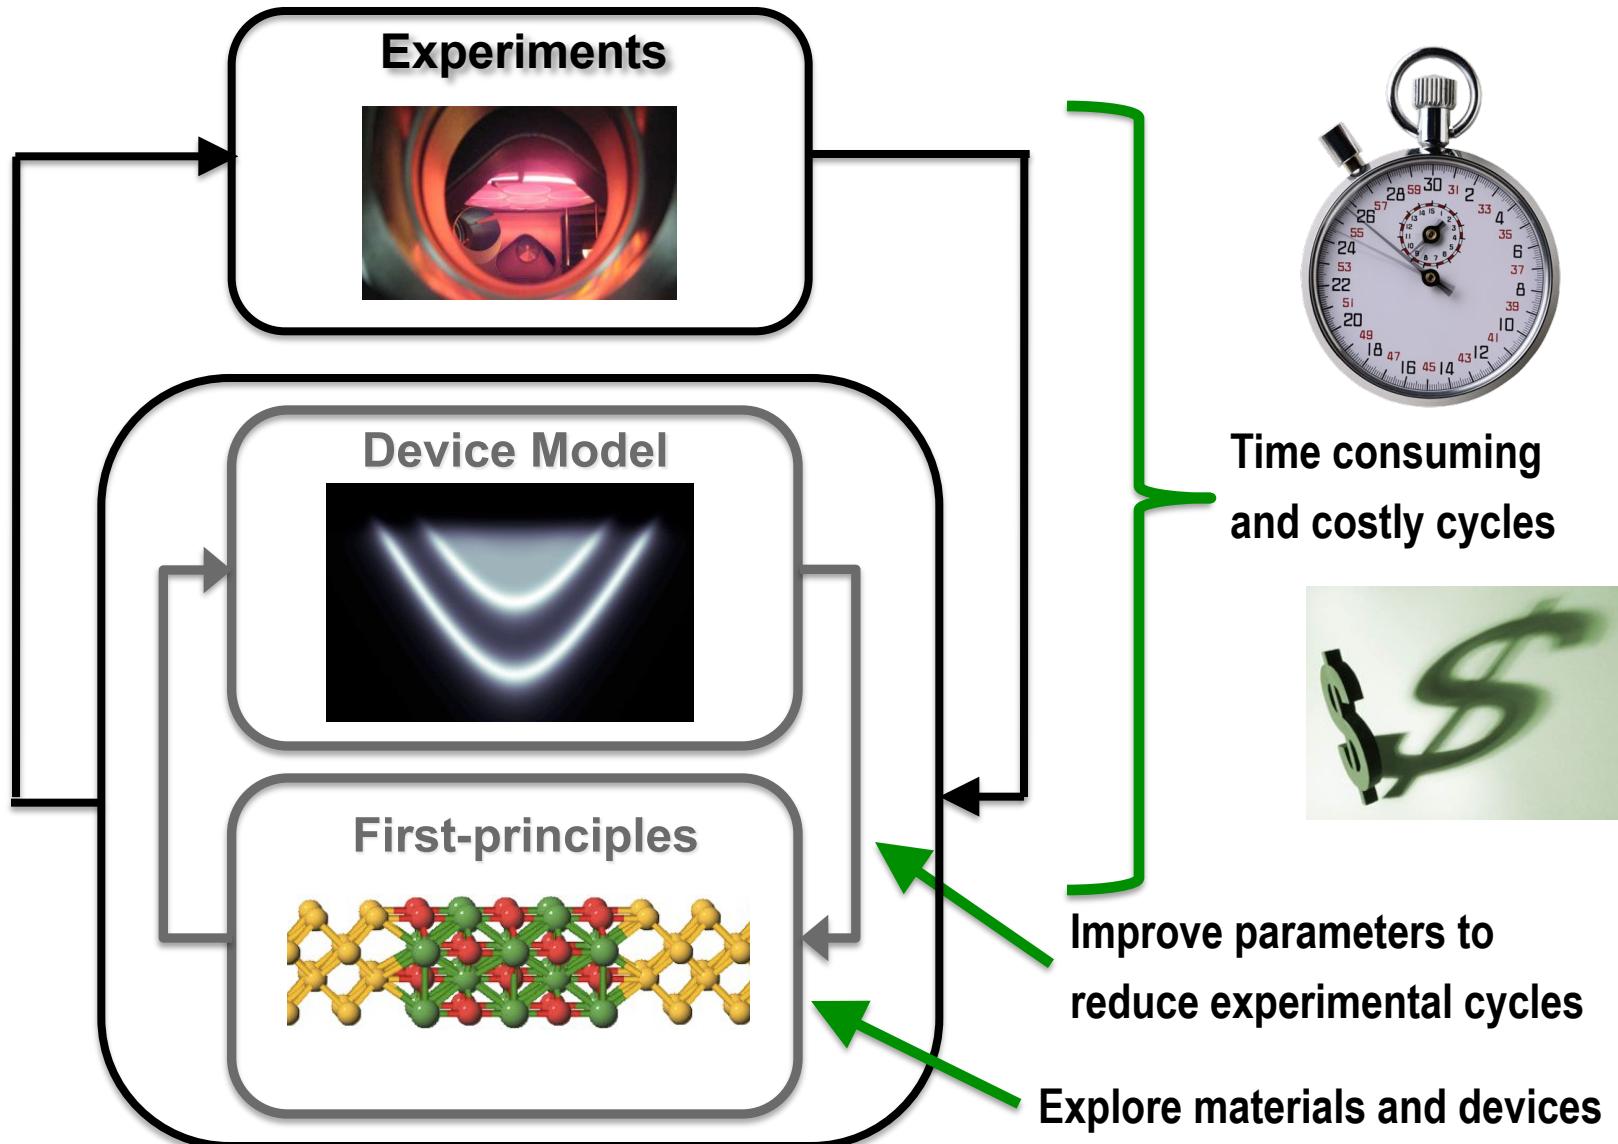

- Yearly Revenues: Undisclosed
- Employees: ~5

Large Market Room For Growth

Why Use TCAD?

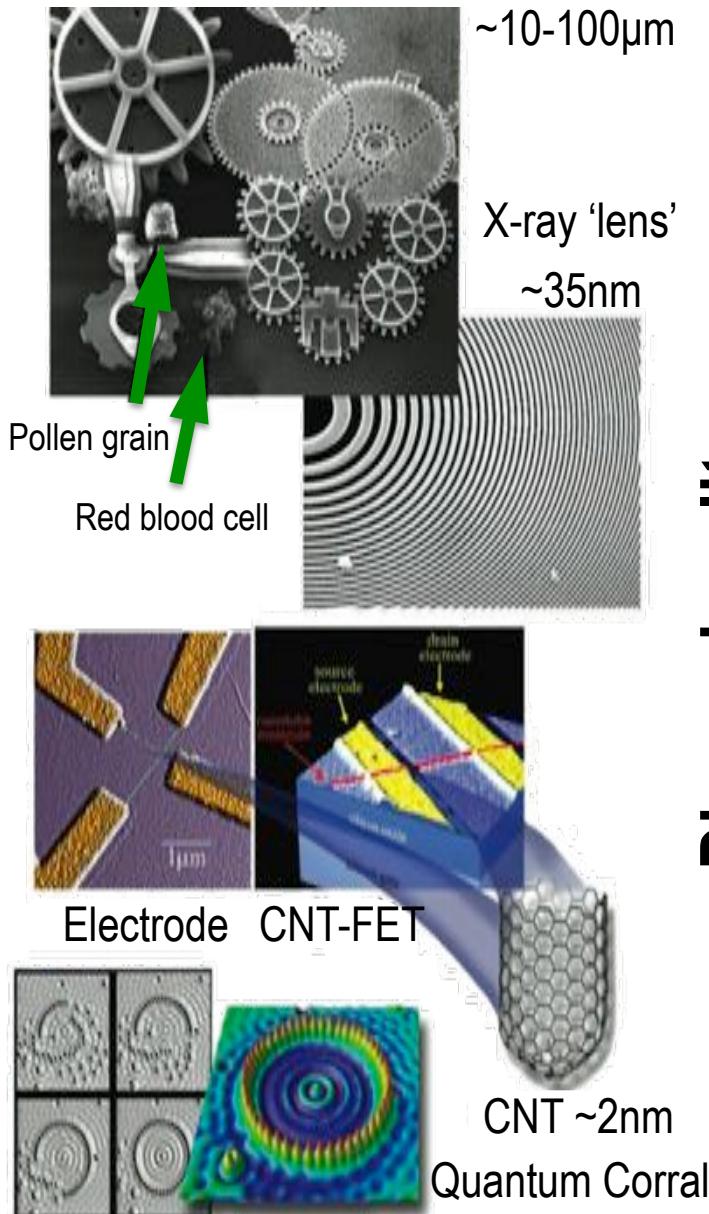

http://cio.gsfc.nasa.gov/centers/jpl/images/content/352556main_wafer-20090528-browse.jpg

McGill University
Montreal, Canada

Technology computer aided design (TCAD) of phosphor-free nanowire white LEDs

TCAD Hierarchy

Dimensionality
Model Parameters

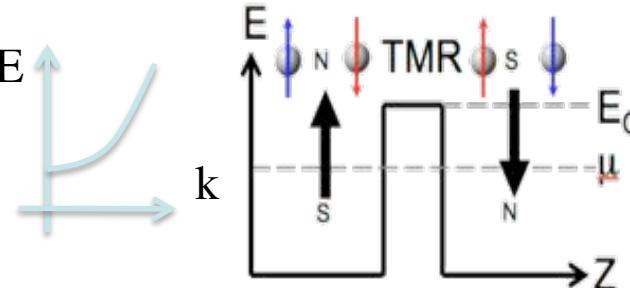

$$E = \frac{\hbar^2 k^2}{2m^*}$$

$$E_C, t_0$$

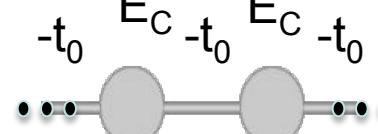

$$V_{XC} = Cn(\bar{r})^{1/3}$$

$$C = \frac{-3}{4(3/\pi)^{1/3}}$$

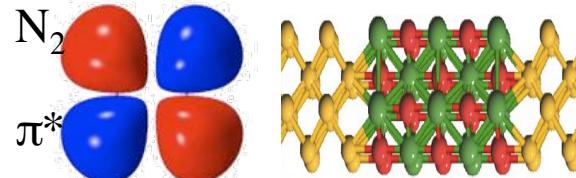

Effective Mass

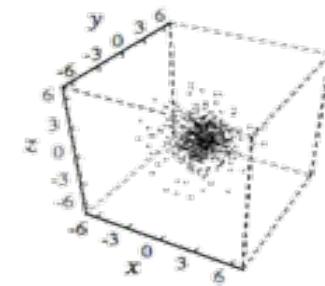

Tight binding

First-principles

Quantum Monte Carlo

Design Requirements

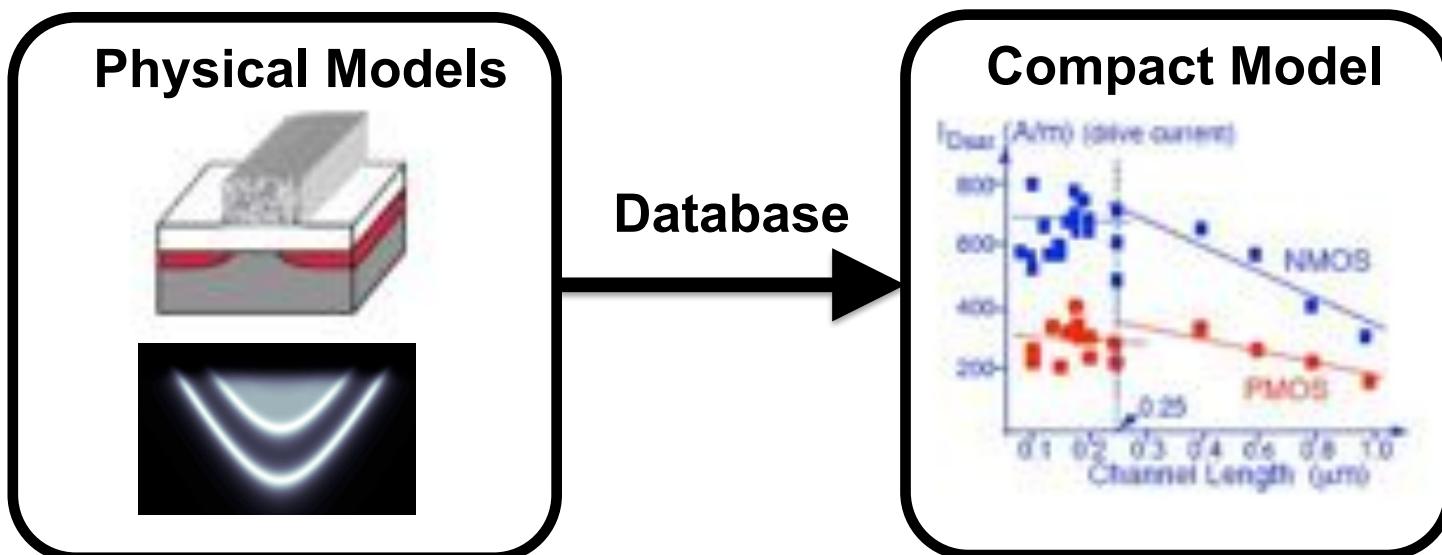

TCAD Theme

■ Proposed Projects:

1. Engineering Enhanced P-type Doping in InGaN/GaN
2. Optimizing InGaN/GaN Nanowire Morphology and Growth
3. Tailoring Carrier Transport and Optical Emission in InGaN/GaN Nanowire LEDs
4. Integrated Compact Nanowire LED Simulator

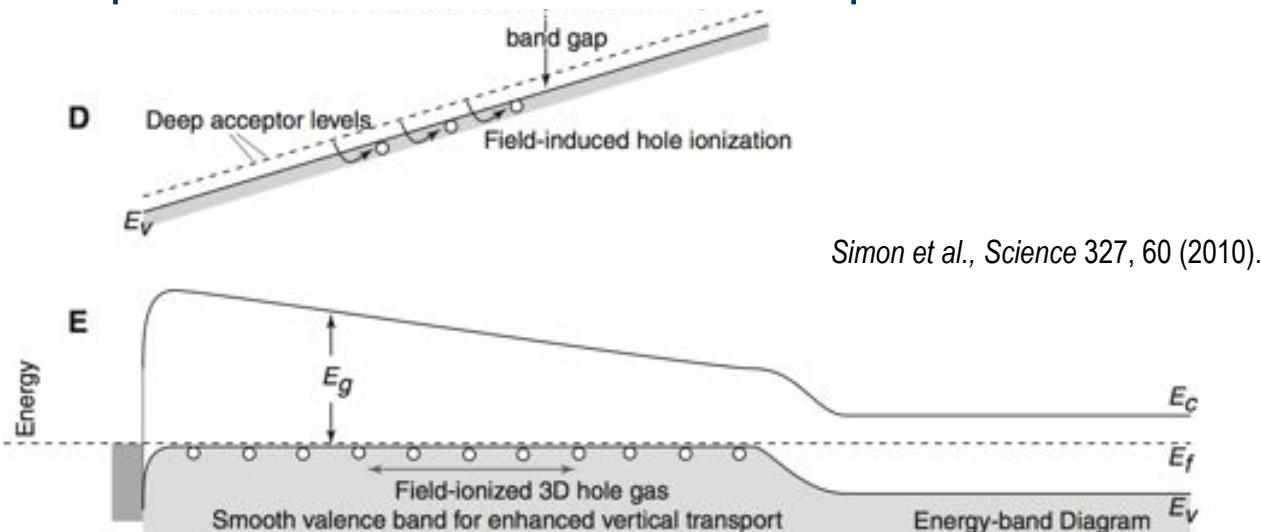

Physical Models

Compact Model

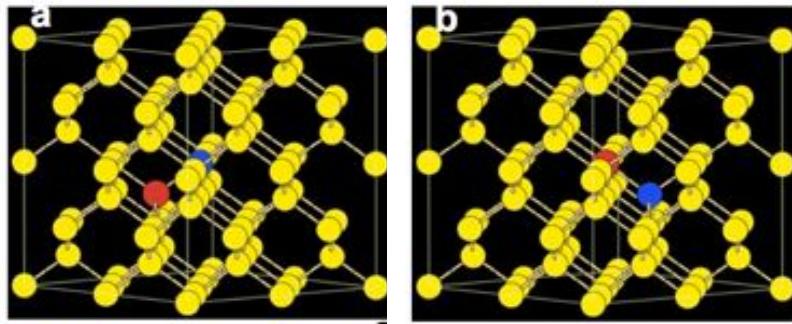

Project 1: Enhanced P-type Doping

- Hole Injection is a big problem...
 - Task A: Explore Polarization Induced Acceptor Ionization

- Task B: Explore Alternate Dopants

Chen et al., *Phys. Rev B* 79, 235202 (2009).

Pierret, "Advanced Semiconductor Fundamentals"

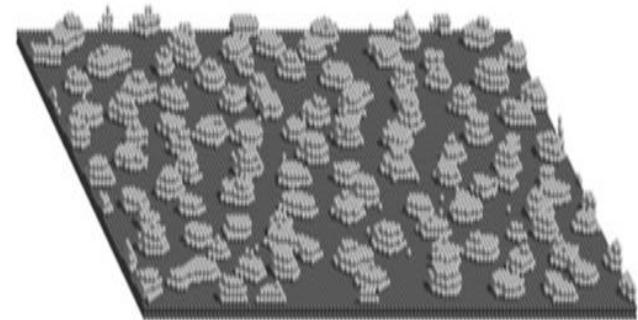

Project 2: Morphology & Growth

- Defects are a major bottleneck...
 - Task A: Reducing Defect Formation During Growth

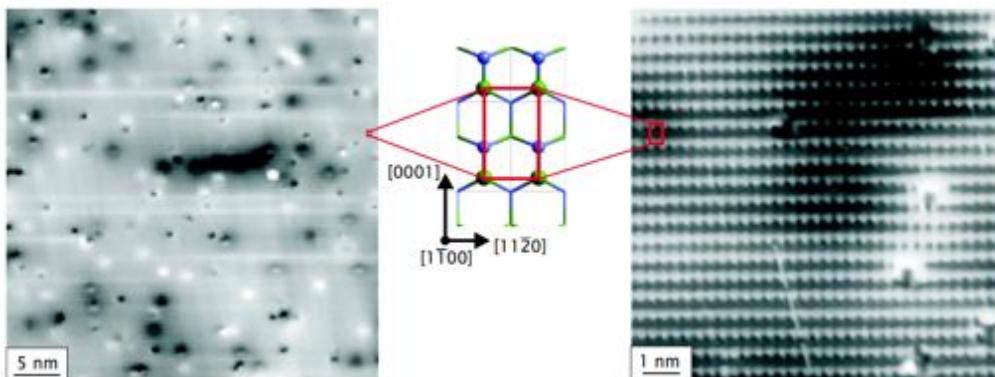

Zhao et al., *Nano Lett.* 12, 2877 (2012).

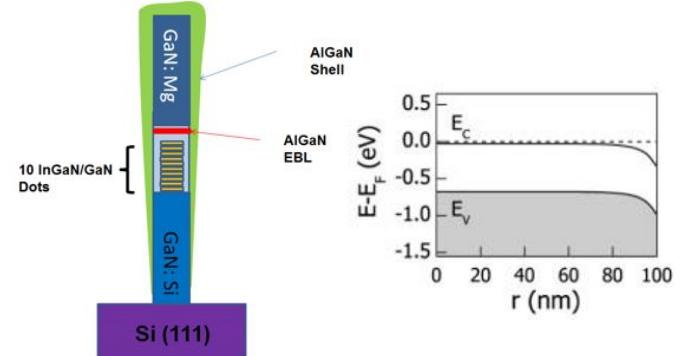

Battaile, *Appl. Mech. Engrg.*, 197, 3386 (2008).

- Task B: Engineering Surface Morphology

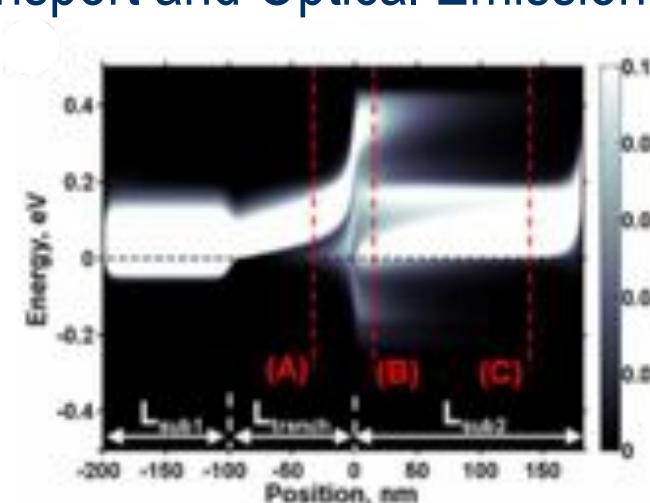

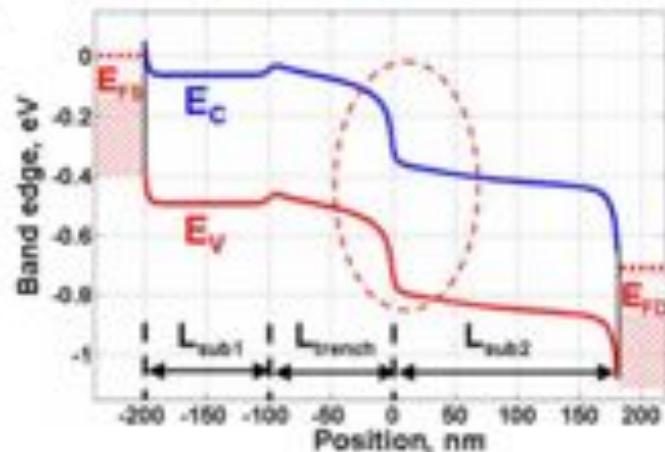

Bertelli et al., *Phys. Rev. B* 80, 115324 (2012).

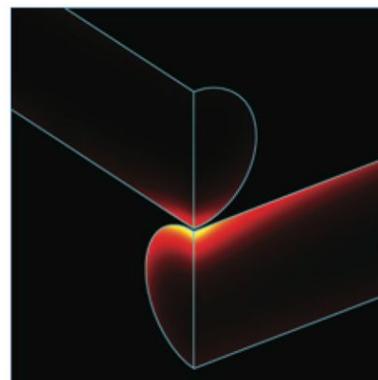

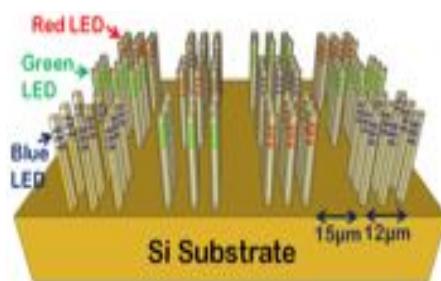

Project 3: Active Device Modeling

- Carrier transport and optical emission...
 - Task A: Optimizing Carrier Transport and Optical Emission

Koswatta et. al.,
Nano Lett. 8, 1596 (2008)

- Task B: Engineering Optical Field Propagation

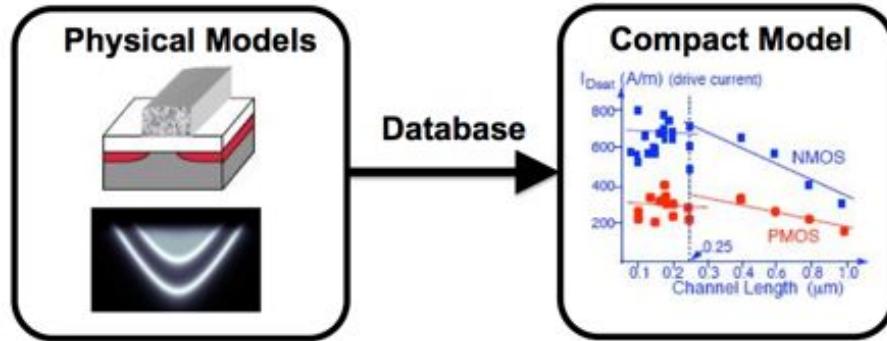

Garnett et. al., Nature Materials 11, 241 (2012)

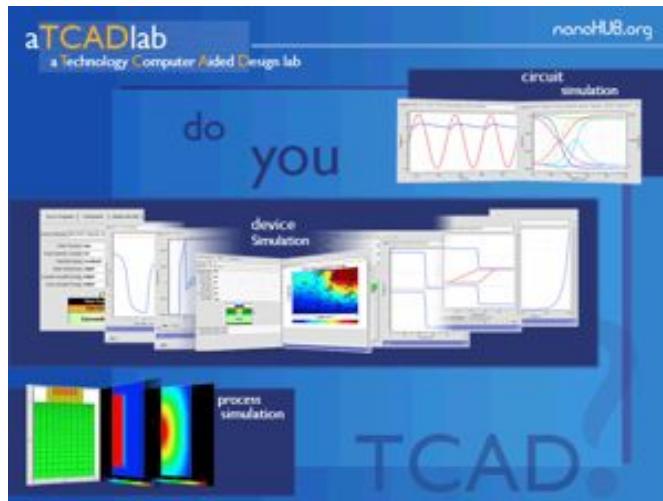

Project 4: Compact Simulator Hub

- Integrating physical models with partner themes...
 - Task A: Physical Model Database Generation

- Task B: Cyberinfrastructure Compact Model Hub
